Research and Publications

Research

2000 - present

Principal Investigator for the Prospective Randomised Clinical Evaluation of the Safety and Effectiveness of the Technolas 217 Excimer Laser as Part of the Zyoptix System for Individualized Patient Treatments Using LASIK for the Correction of 1.00-12.00D of Myopia With up to 6.00D of Astigmatism.

1999 - present

Principal Investigator for the Singapore National Eye Centre Hyperopic LASIK Trial

Principal Investigator for the Singapore National Eye Centre Bioptics Trial for the Correction of Extreme Myopia

1998 - present

Principal Investigator for the Singapore National Eye Centre, LASIK Assessment Trial (SLAST) for the correction of high myopia

Co-Investigator for Keravision Intrastromal Corneal Ring Segment (ICRS) trial for the correction of myopia

1992 - present

laser PRK in the treatment of myopia and astigmatism

1993 - 1994

Decreased ocular dimensions following excimer laser keratectomy in the developing chick eye (completed and presented at

ARVO1994)

1993 - 1994

Effect of excimer laser keratectomy on the cornea of the developing chick (completed and presented at ARVO 1994)

1993 - 1994

Cell proliferation in the myopic eye of the chick (recipient of \$10,000 research grant from the Department of Clinical Research, Singapore General Hospital)

1994 - present

Analysis of tears for proteases, growth factors and cytokines in patients undergoing excimer laser PRK (recipient of \$25,000 research grant from the Singapore Eye Foundation)
